

Andrii Derkach

Go & Python Backend Developer

+38 (096) 26 84 768
Lviv, Ukraine
andrsj.derkach@gmail.com

[Telegram](#) | [GitHub](#) | [LinkedIn](#) | English: Upper Intermediate

Go/Python backend engineer with 4+ years of experience in microservices and distributed systems. Specialized in Go, SQL/NoSQL (Spanner, PostGIS), and event-driven architectures (Kafka/Redpanda). Expert in AI-assisted development (Claude Code) and system performance optimization.

Technical Skills

- **Languages:** Go (Echo, Gin, gRPC), Python (FastAPI, Scrappy), TS/JS (React).
- **Storage & Messaging:** Spanner, PostgreSQL/PostGIS, MongoDB, Redis, Kafka, Redpanda, OpenSearch.
- **Infra & AI:** GCP, K8s, Docker, CI/CD, Ansible, Claude Code, GitHub Copilot.

Experience

Golang Developer | Cherrytrader

June 2025 – Present

Remote

Cloud-based truck trading platform with high-load tracking and analytics.

- Orchestrated 12 Go microservices across dev/staging/prod using gRPC and REST.
- Reduced Cloud Spanner costs by ~28% by optimizing database editions and usage.
- Led integration of 1,000+ listings, building high-performance data pipelines.
- Implemented real-time call tracking using Twilio and virtual proxy numbers.
- Integrated Claude Code to accelerate delivery and catch architectural issues early.

Tech: GCP, Spanner, K8s, Echo, gRPC, Twilio, Claude Code

Golang Developer | AerLogics

Apr 2025 – June 2025

Remote

Aviation telemetry platform with real-time streaming and safety analysis.

- Built event-driven services (Go, gRPC) processing aircraft telemetry via Kafka/Redpanda.
- Designed a shared Go library with CQRS decorators and Kafka producer/consumer abstractions.
- Integrated geospatial flight-path matching using PostGIS and METAR/TFR data.
- Automated aviation data ingestion and validation with Python, reducing onboarding time.

Tech: Go, Kafka/Redpanda, PostgreSQL/PostGIS, OpenSearch, gRPC

Golang Developer | KiraNetwork

Feb 2023 – May 2024

Remote

Blockchain automation and verifiable cloud computing network.

- Developed a DevOps tool for container orchestration using Go Docker SDK and Unix Sockets.
- Reduced Docker image sizes from **7 GB to ~100 MB** through separation of concerns.
- Built a CLI tool for node lifecycle management, monitoring, and failure recovery.

Tech: Go, Docker SDK, Unix Sockets, Ansible, CI/CD

Junior Golang Developer | Luxoft

Feb 2022 – March 2023

Remote

Microservice-based SaaS platform for dental practice management.

- Developed backend microservices for a 20+ service ecosystem using gRPC and REST.
- Decoupled workflows into async pipelines via Kafka/RabbitMQ, increasing resilience.
- Optimized slow SQL/NoSQL queries to resolve production timeout incidents.

Tech: Go, Gin/Echo, Kafka, PostgreSQL, MongoDB, K8s

Education: Master of CS, Ivan Franko National University of Lviv (2021–2022) | Bachelor of CS (2017–2021)
